## **Safe Box Operation Instructions**

Thank you for purchasing our products, please read the instructions carefully before use, please keep the instructions for future reference

A decorative graphic in the bottom right corner of the page, featuring a large, light gray arc that curves from the bottom left towards the right, with several thin, parallel lines radiating from its inner edge.

## 一、 Opening safe box

2043MD safe can be opened by user password (4-6 digits, factory setting 1234) and master password (6 digits).

Steps for first time opening the safe box:

- Input 4\*5# battery into outer connecting battery case, and connect battery case with safe box.
- Enter the factory setting user password "1234", then press "#", Nixie tube shows "DPEHIS", then you can pull the safe door.
- After door is opened, take out the battery and input into the safe inside battery case. (on the door backside)

### Steps for using master password to open safe box:

Enter "\*\*002#", input master password (refer to 3rd menu how to add mater password), press "#" to confirm to open the safe box.

## 二、 Closing safe box

Method a. Enter 4-6 digits, press "#" to confirm, user password is set successfully. Close the safe door, user password will display on the Nixie tube. Guest can close the safe box by press "#" only within 15 minutes after setting the user password. Method b. Enter "\*\*002#", input 6 digits' master password, press "#" to confirm, Nixie tube shows "CLD516".

Method c. Use mechanical key to close the safe box

## 三、 Anti - prying virtual password function

Under opening status, enter "\*\*001#", show "INOLDT", enter last master password, press "#" to confirm. If failed, Nixie tube shows "OLDERR", if succeed, shows "INNEYT", then can enter 6 digits' new master password. When shows "RBRINT", enter same new password again, then finish setting. If set successfully, shows "TEY-OT", set wrongly . shows "TEY-NS". For new safe , no master password was set, then input new master password directly.

## 四、 Anti - prying virtual password function

Use mechanical key to open the safe box when forgot password .

## 五、 Notes

- When voltage is lower than "4.8" V, Nixie Tube will show "BRFLD" and beep once, then need to change new battery.
- Enter wrong password will show "TEYER", if wrongly input 3 times, safe will be locked for 15 minutes, shows "HOLD +Minutes".
- Enter "\*\*003#", can hide the password and shows "n", do same operation again , will show the password .
- Click "\*" to delete when enter passwords
- When safe is under opening status, enter "\*\*0752456789#" to delete the parameters set by guests. Nixie tube will show "CLRPR"
- When close the safe, if not close completely , nixie tube will show "RUNERR" and can hear a long beep.
- Enter" \*\*004#" to know the safe version . format is "UER +3 numbers"
